### FEDERAL ENERGY REGULATORY COMMISSION

Tennessee Gas Pipeline Company, L.L.C.

Docket No. CP13-3-000

#### Notice of Availability of the Environmental Assessment for the Proposed Rose Lake Expansion Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Rose Lake Expansion Project, proposed by Tennessee Gas Pipeline Company, L.L.C. (TGP) in the above-referenced docket. TGP requests authorization to construct compressor facilities in Tioga and Bradford Counties, Pennsylvania to provide up to 230,000 dekatherms per day of natural gas delivery capacity to the northeast region.

The EA assesses the potential environmental effects of the construction and operation of the Rose Lake Expansion Project in accordance with the requirements of the National Environmental Policy Act. The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The proposed Rose Lake Expansion Project includes the following modifications at three existing compressor stations along TGP's 300 Line:

- installing a 12,630-horsepower (hp) turbine-compressor package at Compressor Station 315 near Wellsboro, Tioga County;
- abandoning by removal an existing compressor and replacing it with a new compressor at Compressor Station 317 near Troy, Bradford County;
- abandoning in place two existing 4,500-hp compressor units and replacing them with a new 16,000-hp turbine-compressor package at Compressor Station 319 near Wyalusing, Bradford County; and
- installing ancillary equipment and piping modifications at Compressor Stations 315, 317, and 319.

The FERC staff mailed copies of the EA to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; newspapers and libraries in the project area; and parties to this proceeding.

In addition, the EA is available for public viewing on the FERC's website ([www.ferc.gov](http://www.ferc.gov)) using the eLibrary link. A limited number of copies of the EA are available for distribution and public inspection at:
